

Semester: III

Subject Name: Research Methodology

Date: 18-09-2026 | Time: 1 hour

Course: MCA

Subject Code: 25 HSM 310

Max. Marks: 20

COURSE OUTCOMES:

- CO1: Understand the meaning, objectives, types and process of research, and define a research problem with clearly stated scope and objectives.
- CO2: Review the existing literature to develop theoretical and conceptual frameworks, and apply research ethics and plagiarism prevention practices in research writing.
- CO3: Understand the nature of intellectual property and the process and procedure of patenting in the national and international scenario.
- CO4: Understand the scope of patent rights, licensing and transfer of technology, patent databases, and new developments in IPR.
- CO5: Analyze and interpret statistical results to draw valid conclusions for research problems.

PART A: ANSWER ALL THE QUESTIONS

Each question carries 1 mark 4Qx1=04

Q	QUESTIONS	BL	CO
1	a Recall the type of research that is concerned with describing the characteristics of a particular individual or of a group as it exists at present.	1	CO1
	b A company investigates why the sales of one of its products declined sharply in a particular region. Identify the type of research being carried out.	2	CO3
	c List any two tools that are commonly used for plagiarism checking.	1	CO2
	d A research scholar reproduces two paragraphs from a published journal paper in his thesis without citing the source. Explain what this practice is called.	2	CO2

PART B: ANSWER ALL THE QUESTIONS

Each question carries 4 marks

3QX4=12

Q	QUESTIONS	BL	CO
2	a A student has been asked to conduct a study on the adoption of digital payments among small retailers. - Apply the steps of the research process to this study and present them as a neat flow diagram. - Demonstrate how the criteria of good research are satisfied at each stage.	3	CO1
	OR b A student wishes to study the impact of online learning on the academic performance of MCA students. - Apply your understanding to define the research problem clearly. - State the characteristics of a good research problem and show how your problem satisfies them.	3	CO1
3	a A scholar has collected twenty research papers on "Machine Learning in Healthcare" but is unable to narrow down a research problem. - Apply the process of literature review to organise and screen these papers. - Demonstrate how the review brings clarity and focus to the research problem and improves the research methodology.	3	CO2
	OR b A first-year research scholar has selected "Cyber Security in Banking" as the area of study. - Apply the procedure for searching the existing literature and reviewing the selected literature. - Explain how a theoretical framework and a conceptual framework are developed from the review.	3	CO2
4	a A university has made a plagiarism check compulsory before thesis submission. Apply your knowledge to explain the different forms of plagiarism with one example each.	3	CO2
